

The World's Largest Sperm Bank

A Dream Come True

It all started with a strange dream about frozen sperm. Today, Cryos International Denmark is the largest sperm bank in the world. Founder Ole Schou tells the story.

I don't know why I had this dream back in 1981. But for some strange reason, the moment I woke up I just knew I had to find out everything there was to know about frozen sperm. It became somewhat of an obsession and I basically read every book and paper ever written about the subject. Little did I know, that all of a sudden I had actually become one of the leading experts in the subject without even being a scholar of natural science.

*Ole Schou,
founder of Cryos International Denmark.*

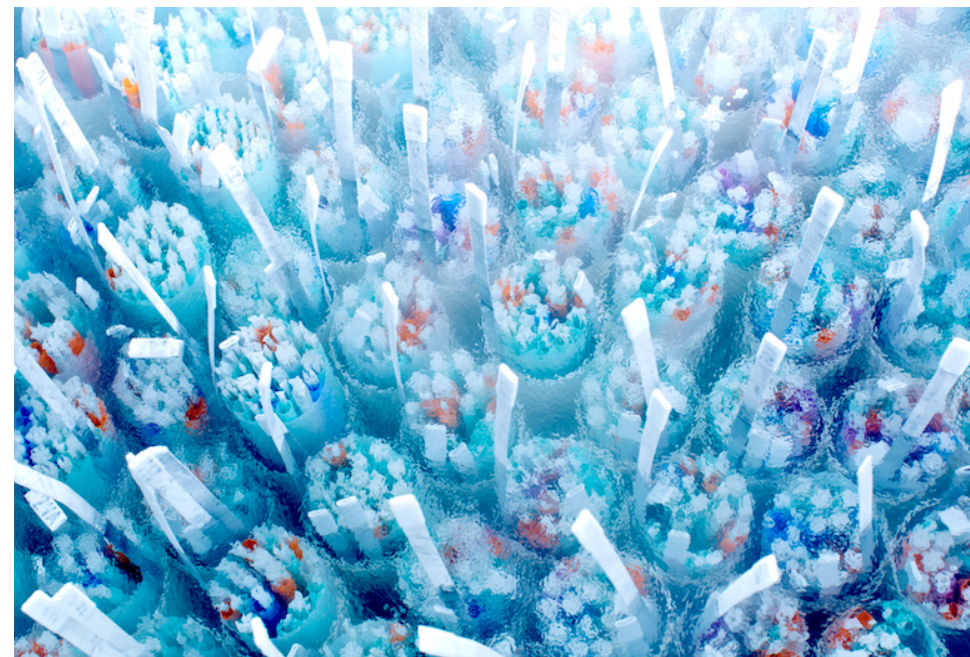

Fortunately, I was able to combine my knowledge about frozen sperm with a Graduate Diploma in Business & Administration, and gradually establish a successful commercial business.

Utilising my knowledge about the process of freezing and storing human sperm, I started collaborating with doctors and clinics who were very satisfied with my work and my product. Business took off, and first my office and laboratory was established as a service merely for frozen sperm storage. In 1990 the donor programme was established, and international demand increased rapidly.

At Cryos International Denmark we take great pride in not only being the world's largest sperm bank, but also in having the largest selection of donors and free of charge access to online donor search. We have more than 600 Anonymous & Non-anonymous donors and furthermore, we boast the highest number of registered pregnancies in the world.

Cryos supplies to more than 80 countries worldwide. Still, our international success cannot merely be attributed to our advanced research and development. In the end, it's all about people; the people who work at Cryos, our great donors, and most of all the people who have put their trust in us and who are now – as a result of our work – the proud parents of happy, healthy children.

The World's Largest Sperm Bank

Cryos continuously strives to ensure the greatest selection of high quality sperm from donors of all phenotypes and ethnicities.

This means that your clinic can choose from the widest range of either Anonymous & Non-anonymous donors with either Basic or Extended profiles. The Basic and the Extended profiles are distinguished by how much personal donor information is available and by the availability of pictures, audio clips, handwriting, emotional intelligence test, and staff impressions.

Guinness Book of Records has documented that Cryos has the largest sperm donor base in the world. As Cryos cooperates with an extensive network of clinics and hospitals worldwide, Cryos has over the years reached the highest number of registered donor sperm pregnancies in the world. Cryos supplies the sperm quality, meeting your clinic's requirements for fertility treatment.

Licensed As A Tissue Centre

Cryos is licensed according to the EU-Tissue Directive 2004/23/CE, 2006/17/EC and 2006/86/EC, setting standards of quality and safety for the donation, procurement, testing,

processing, preservation, storage and distribution, import and export of sperm. This means that Cryos can deliver donor sperm in all EU countries as well as export outside of the EU.

Cryos Donors

Our donors undergo rigorous selection criteria and thorough medical examinations prior to acceptance and clearance to become a donor. Donors are screened for a battery of infectious and hereditary diseases.

Furthermore, donors undergo physical and psychological tests and despite being healthy young men, often students of higher education, only a small percentage are accepted as Cryos donors.

Reliability And Service

To Ole Schou and Cryos high quality and professional personal service has always ranked as the most important issue in our relations with our partners.

Cryos continuously work hard on improving and expanding its customer services. Today we have staff speaking English, French, German, Italian, Spanish and Scandinavian languages. In addition, Cryos has developed the most comprehensive information system including log-in to our website: dk.cryosinternational.com for clinics to track their own data. As a pioneer and the world's largest sperm

bank Cryos has taken responsibility and contributed significantly to scientific research as well as to the debate about ethical, legal and social issues related to donor sperm. Through mutual cooperation with clinics, hospitals and researchers Cryos' medical, laboratory and customer service staff continuously strive to improve professional knowledge within the field.

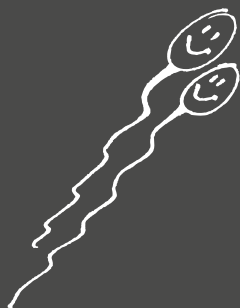

Furthermore Cryos offers

- The world's largest selection of donors
- Reservation of donor sperm before treatment and for future siblings
- Donor exclusivity through selected donors
